

# Ošetřovatelství v databázích PubMed a Medline Ovid

Mgr. Jana Hercová  
Rešeršní odd. NLK Praha  
E-mail: [hercova@nlk.cz](mailto:hercova@nlk.cz)

## Nárůst témat z oblasti ošetřovatelství- požadavky na řešeršní odd. NLK

- **Rok 2008** – z celkového počtu 1341 požadavků tvoří ošetřovatelství cca **1/6**
- **Rok 2009** – z celkového počtu 1548 požadavků tvoří ošetřovatelství už **1/4**

# Nejčastější typy dotazů

- Ošetrovatelský proces.....choroba
- Kvalita života pacientů.....choroba
- Edukace pacientů.....choroba
- Management
- Ošetrovatelské diagnózy
- Komunikace sestra-pacient
- Postavení sester, profesní problematika, vnímání sestry veřejností (prestiž), atd.

# Databáze pro ošetřovatelská témata dostupná v NLK

- **BMČ**-nejfrekventovanější databáze (musíme brát v úvahu jazykovou bariéru)-více jak polovina rešeršních požadavků vyžaduje pouze literaturu v češtině a slovenštině
- **Medline a Embase**
- **CINAHL** – specializovaná databáze, se vstupy do plných textů (neplatí absolutně)
- **Journal Citation Reports**- přehled zahraničních časopisů ve dvou kategoriích, které mají impakt faktor

# Medline – tvořen 3 databázemi

- Index Medicus
- Index to Dental Literature
- **International Nursing Index** – v minulosti možnost omezení na tento index, dnes omezení na ošetrovatelské časopisy (**Subset-Nursing Journals**)

# PubMed

Ošetrovatelství na operačním sále  
**Operating room nursing**

Bez použití Medical Subject Headings  
S použitím Medical Subject Headings

# Bez použití MeSH

The image shows a screenshot of the PubMed website as viewed in a Windows Internet Explorer browser. The address bar shows the URL <http://www.ncbi.nlm.nih.gov/sites/entrez?db=pubmed>. The search bar contains the text "operating room nursing" and the "Search" button is circled in red. The page header includes the NCBI logo and navigation links like "Resources" and "How To". Below the search bar, there is a section titled "PubMed" with a description: "PubMed comprises more than 19 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full-text content from PubMed Central and publisher web sites." The page is organized into three columns: "Using PubMed" (with links like "PubMed Quick Start Guide", "Full Text Articles", "PubMed FAQs", "PubMed Tutorials", and "New and Noteworthy"), "PubMed Tools" (with links like "Single Citation Matcher", "Batch Citation Matcher", "Clinical Queries", and "Topic-Specific Queries"), and "More Resources" (with links like "MeSH Database", "Journals Database", "Clinical Trials", "E-Utilities", and "LinkOut"). The browser's taskbar at the bottom shows the Start button and several open windows, including "Ošetřovatelství v databá...", "Odkazy a popis zdrojů...", and "PubMed home - Wind...". The system clock in the bottom right corner shows the time as 9:42.

### Association between operational indexes and the utilization rate of a general surgery center.

Nepote MH, Monteiro IU, Hardy E.  
Faculdade de Ciências Médicas, Universidade Estadual de Campinas, Brazil. ccirurgico@cmcnet.com.br

#### Abstract

This is a prospective study that focused on the dynamics of operating rooms using operational indexes that measure optimization, resistance, overload and utilization of the surgical unit, and also identified the factors most associated with these indexes. A total of 1,908 surgeries were analyzed over a period of two months in 2007. The average rates of utilization, optimization and resistance indexes were 80.41%, 65.35% and 34.65% respectively. The difference between the positive and negative overload index was low (5.42%). Operating room rescheduling and delays were the variables that contributed the most to the increase in these indexes. In the linear regression statistical model, the utilization rate was found to be the first common variable selected in the overload, resistance and optimization indexes. It is essential to work on these operational indexes with a view to obtain satisfactory results in the management of the surgical center, with well-defined work processes and teamwork.

**Authors** Chard R.

**Title** How perioperative nurses define, attribute causes of, and react to intraoperative nursing errors.

**Abbreviated Source** AORN J. 91(1):132-45, 2010 Jan.

**NLM Journal Name** AORN journal

**Abstract** Errors in nursing practice pose a continuing threat to patient safety. A descriptive, correlational study was conducted to examine the definitions, circumstances, and perceived causes of intraoperative nursing errors; reactions of perioperative nurses to intraoperative nursing errors; and the relationships among coping with intraoperative nursing errors, emotional distress, and changes in practice made as a result of error. The results indicate that strategies of accepting responsibility and using self-control are significant predictors of emotional distress. Seeking social support and planful problem solving emerged as significant predictors of constructive changes in practice. Most predictive of defensive changes was the strategy of escape/avoidance. Abstract
  Academic writing can fill pre- and postregistration students with fear and dread. Students often construct written work around re-worded passages from their sources. This results in poor quality work, low marks and frustration. The aim of this article is to inform students embarking on courses in higher education about what academic writing is and equally importantly what it is not.

Title
  Preceptorship planning is essential to perioperative nursing retention: matching teaching and learning styles. [Review] [18 refs]
Abbreviated Source
  Can Oper Room Nurs J. 28(1):8, 10-1, 16 passim, 2010 Mar.
NLM Journal Name
  Canadian operating room nursing journal
Abstract
  Current nursing shortages along with unsuccessful nursing orientation programs have been a major concern for the past decade because they result in poor retention, reduced quality of patient care, decreased job satisfaction and high financial costs to the organization. Specialty areas, such as the Operating Room (OR), are even more vulnerable due to the stressful working environment and critical care skill set. It has been estimated that approximately 35-65% of new graduates will leave their work place within the first year of employment, lending to the 55% nursing turnover rate. The cost of orientating a new nurse to the perioperative role is estimated to cost between $50,000 and $59,000 U.S. Thus, it is imperative to improve the orientation experience for both new and senior perioperative nurses. Matching preceptor/preceptee learning styles is one way to enhance job satisfaction levels. This paper revisits the literature on preceptorship and provides suggestions on how to enhance existing orientation programs. [References: 18]

# Dostupnost 20 titulů s nejvyšším IF v ČR

The screenshot shows a Microsoft Word document titled "Ošetřovatelství-tabulka IF - Microsoft Word". The document contains a table with 20 rows, each representing a journal. The columns are: "Titul", "ISSN", "IF", and "Dostupnost". The table lists journals such as "Birth", "Int J Nurs Stud", "Oncol Nurs Forum", etc., along with their respective ISSN and IF values. The availability ("Dostupnost") is listed for each journal, such as "Wiley", "Elsevier", "Ebsco, ProQuest, CINAHL po 1 roce", etc.

	Titul	ISSN	IF	Dostupnost
1.	<a href="#">Birth</a>	0730-7659	2.836	<a href="#">Wiley</a>
2.	<a href="#">Int J Nurs Stud</a>	0020-7489	2.310	<a href="#">Elsevier</a>
3.	<a href="#">Oncol Nurs Forum</a>	0190-535x	2.207	<a href="#">Ebsco, ProQuest, CINAHL po 1 roce</a>
4.	<a href="#">Am J Crit Care</a>	1062-3264	2.043	<a href="#">CINAHL, ProQuest jen do r.2007</a>
